

Hi Calculator – **PLEASE BE AWARE!!!!!!**

A secrecy app for photos & videos

The App appears and operates on a mobile device as a calculator, however, once a password has been entered the children can store photographs or videos on the App as well as share them with others.

This allows children to keep photographs and videos a secret.

The App does not contain an age restriction and therefore can be accessed by anyone.

We would advise all parents to monitor your child's activities online and be aware of this app appearing on your child's phone.
